### Customer

#### Start Order Page

#### Menu Page

Once the customer has clicked Start Order, they will be brought to the Menu Page. The customer can now pick which items they want to order by searching through four different categories. See *Figure 1* and *Figure 2*.

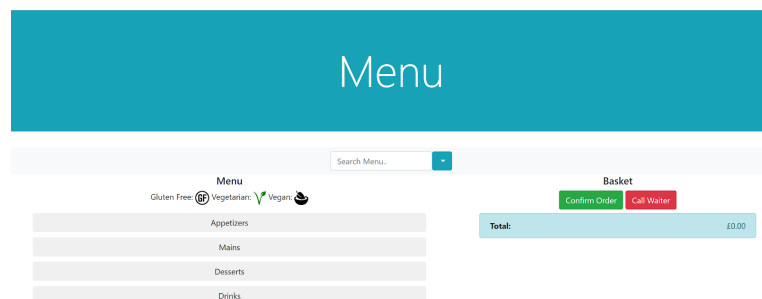

Figure 1: The Menu Page with Closed Categories

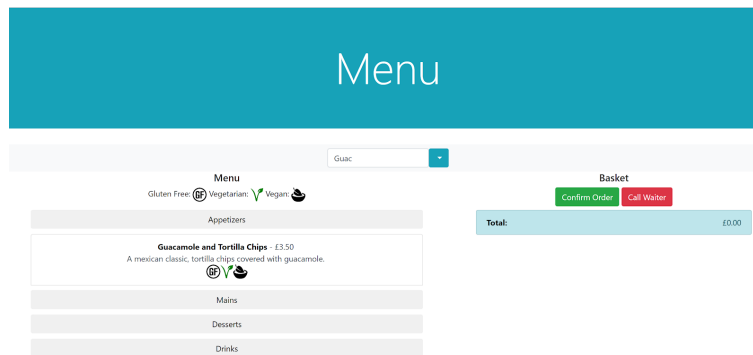

Figure 2: The Menu Page with Open Categories

A customer can also search for an item, filtering by a specific category (vegan/vegetarian/gluten free) which will only display items that meet the category criteria. See *Figure 3*.

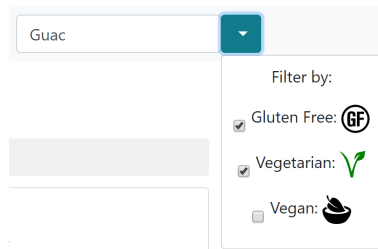

Figure 3: The Menu Filtering Section

Once the customer clicks on the menu item they want to order, an item summary will pop up and will display more information such as the Price and the description of the item. They can also add specific instructions that will then be seen by the chefs that cook the meal. When the customer clicks the Add to Order button, the order is added to the list. See *Figure 4*.

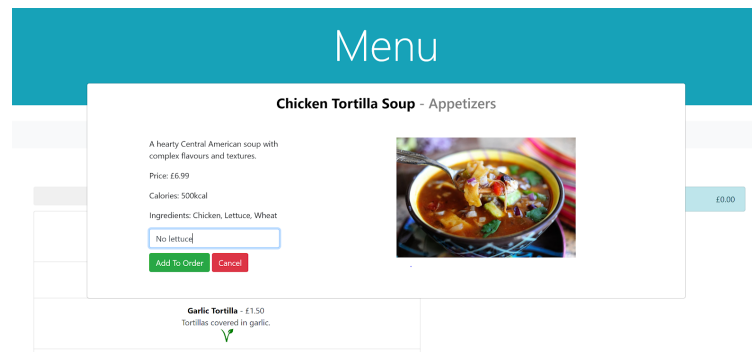

Figure 4: The Menu Item Modal

The menu items that the customer has added to the order is then displayed under the basket order list. This list will show the items that have been added, their individual price and the total price. Once the customer is happy that they have all the items they want to order, they will click Confirm Order to send the list to the basket page. See *Figure 5*.

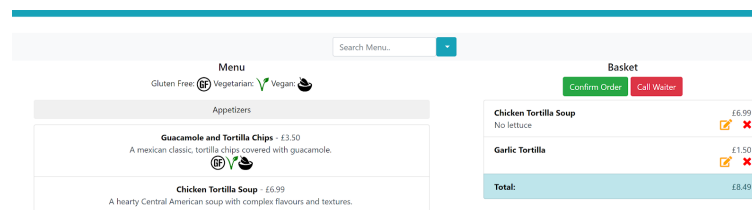

Figure 5: The Menu Page with an Order

## Basket Page

See *Figure 6*.

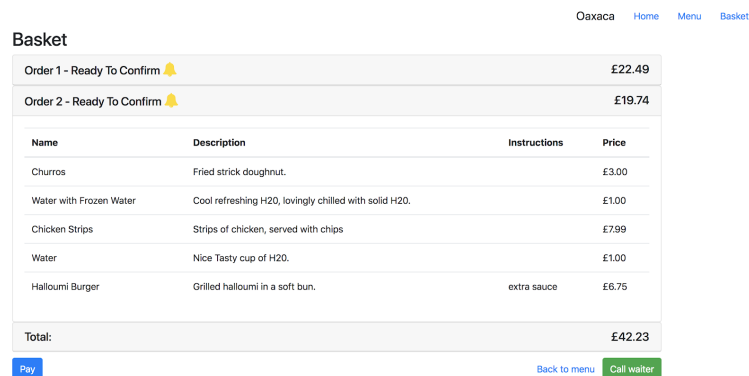

This is the page the customer is taken to once they have selected and confirmed what they want to order. Customers can add to the same order by navigating to the basket page via the link in the top right of the page, or can start a new order by navigating to the home page.

Each order has an order number, shows the status of the order (along with a little symbol that reflects this) and the price for that order. Orders contain a table with all the items in that order. The table includes the name of each item, a short description, any instructions that were added and the price. If more than one of the same item is added to the order, it is shown by a repetition of the item in the order table.

At the bottom of the accordion element the total price is displayed for all orders so that customers have an up to date idea of how much their meal

is costing them. The call waiter button simply notifies a waiter that the particular table needs assistance and confirms with the customer that this has been done via a modal. There is also a back to menu button next to call waiter for convenience.

This view gives the customer a good idea of what is going on with their orders and allows them to plan what else they may want to get accordingly.

The screenshot shows a web interface for a restaurant's basket. At the top right, there are navigation links: "Oaxaca", "Home", "Menu", and "Basket". The main heading is "Basket". Below it, there are two order summaries: "Order 1 - Ready To Confirm" with a price of £22.49 and "Order 2 - Ready To Confirm" with a price of £19.74. Below these is a table of items. The table has four columns: "Name", "Description", "Instructions", and "Price". The items listed are: Churros (£3.00), Water with Frozen Water (£1.00), Chicken Strips (£7.99), Water (£1.00), and Halloumi Burger (£6.75). The Halloumi Burger has an additional instruction "extra sauce". At the bottom of the table, the "Total:" is £42.23. Below the table, there are three buttons: "Pay" (blue), "Back to menu" (blue), and "Call waiter" (green).

Name	Description	Instructions	Price
Churros	Fried strick doughnut.		£3.00
Water with Frozen Water	Cool refreshing H2O, lovingly chilled with solid H2O.		£1.00
Chicken Strips	Strips of chicken, served with chips		£7.99
Water	Nice Tasty cup of H2O.		£1.00
Halloumi Burger	Grilled halloumi in a soft bun.	extra sauce	£6.75
Total:			£42.23
